

The social system in Brave New World

Superior, intelligent, physically attractive

- they receive the most oxygen in order to develop the best brains
- intellectually demanding jobs

Inferior, mentally deficient, physically unattractive

- They don't receive enough oxygen and are poisoned as there's no need for intelligence
- menial jobs

People are a result of pre-natal provision and conditioning

- People are not seen as individual human beings
- The only important thing is Society as a whole. It is controlled and manipulated

The social system resembles the feudal system in mediaeval times:
-Only the ten elite rulers ($\alpha++$) have freedom of choice. They control EVERYTHING
-Everyone else must accept all values of society and the class system because of their conditioning and their lower intellect

- Alpha and Beta-men and women remain individuals. Gamma-, Delta- and Epsilon people are bokanovskified
- every group looks physically different and has a distinctive colour.
